Office Action Summary

Application No.

10/533,343

Applicant(s)

QUEHENBERGER ET AL.

Examiner

Rodney H. Bonck

Art Unit

3681

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 29 April 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-9 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-9 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☒ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 29 March 2005 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☒ All b) ☐ Some * c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. _____.
 - ☒ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

The following is a first action on the merits of application Serial No.10/533,343, filed April 29, 2005.

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Information Disclosure Statement

Receipt is acknowledged of the Information Disclosure Statement filed March 29, 2005. The cited documents have been considered.

Specification

The disclosure is objected to because of the following informalities:

There appears to be no brief description or detailed description of Figs. 4 and 5.

Appropriate correction is required.

Claim Objections

Claim 7 is objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Claim 7 depends

from claim 8. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claim 1, line 1, the intended meaning of "with a simple function" is unclear. There does not appear to be a proper antecedent basis for "the side of the pump". Also the intended antecedent of "it", line 11 of claim 1, is not clear. Which two units are referred to by "the two units" is unclear since three units have been defined. There appears to be no antecedent basis for "the spring", line 2 of claim 3. The intended antecedent of "it" in line 4 of claim 3 is unclear. In claim 4, the intended meaning of "executed as a piston" is not understood. The expression "of which the second chamber communicates with the electric motor/pump unit", in lines 7-8 of claim 4, is also not understood. Claim 5 appears to contradict the claims from which it depends by calling for the nonreturn valve to be "contained in the slide", since claim 1 calls for the nonreturn valve to be "between the two units". It is unclear what is referred to by "for which purpose", lines 2-3 of claim 5. In claim 6, "the spring" and "the first position" lack a proper antecedent basis. Similarly, "the spring", "the first position"

and "the feed", in claim 7, lack antecedent basis. There is no proper antecedent for "the spring" in lines 1 and 2 of claim 9.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 1-9, insofar as definite, are rejected under 35 U.S.C. 103(a) as being unpatentable over Gondek('688) in view of Gondek('879). Gondek('688) discloses an actuator having a cylinder/piston unit 49, a reversible pump unit 15, and a self-regulating valve unit 21. The valve unit includes a dump valve and a nonreturn valve 56. The dump valve has a sleeve and a spring-assisted slide 26. Reversing the pump

accelerates the opening of the dump valve. The claims appear to require that the pump is driven by an electric motor, and Gondek('688) does not disclose an electric motor drive for pump 15. In a similar device, though, Gondek('879) provides pump 10 that is driven by a reversible electric motor. It would have been obvious to use a reversible electric motor in Gondek('688) since use of such a motor has been shown to be suitable for this environment. Note that the intended use statement of "for the control of a friction clutch" does not carry patentable weight in these claims to the actuator; and, since the Gondek('688) device is capable of use in controlling a clutch, the claims are met by the Gondek arrangement.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Vohl('503) and Goucher et al.('364) show cylinder/piston units for controlling friction clutches.

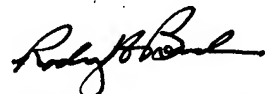

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Rodney H. Bonck whose telephone number is (571) 272-7089. The examiner can normally be reached on Monday-Friday 7:00AM - 3:30PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Charles A. Marmor can be reached on (571) 272-7095. The fax phone
